

# VERTICAL REFERENCE DOOR

## Vertical Reference Door

Heli-Trade, in conjunction with other operators, developed and acquired the STC for the Vertical Reference Door in the early 80's. After several modifications and requests from operators, we have developed one of the best long-line referencing systems available on the 205 today.

Researched and implemented by pilots and mechanics, our Vertical Reference Door provides the pilot with the information necessary to safely monitor the aircraft and engine systems while maintaining an unobstructed view of the sling load. Your sensitive instruments

are protected from the damaging effects of the sun by the addition of a UV coating on the transparency. The door has been modified to allow unfettered movement of the collective. In conjunction with the Vertical Reference Door, the co-pilot collective head has been altered to accept a cargo release switch.

In today's harsh environments and the continuing call for improved safety, an operator must have the best equipment installed to be competitive and above all others in the areas of safety and operational integrity. Our Vertical Reference Door fills those tall orders and allows an operator to do what they have to do to get the job done safely, quickly and efficiently.

Heli-Conversions specializes in the R&D, production, FAA certification, worldwide marketing, and support of "aftermarket" improvements for the Bell 205/UH-1 series helicopter. All improvements are based on more than 25 years of operational experience, ensuring increased profitability and enhanced safety.

## STCs

SH4305NM	Centrisep® Particle Separator
SH89-22	
SH2394NM	-17A or -17B Engine
SH89-21	
SH5132NM	212 Rotor Blades
SH91-38	
SH5976NM	-17A or -17B Engine/212 Rotor Blades
SH95-12	
SH5977NM	-17A or -17B Engine/212-9 Pax
SH95-13	
SH5797NM	T53-HC Engine Wash Kit
SH94-6	
SH5122NM	EGT/MGT Indicator (Cycle Counter)
SH91-37	
SH2692NM	Dual Electric Boost Pump
SH90-29	
SH4775NM	Manual Start Fuel Switch
SH90-15	
SH2691NM	Vertical Reference Door
Pending	Left Hand Pilot In Command
Pending	Fuel Recovery System
